

YOGESH BISANE

Front End Developer & UX Engineer | Full Stack | Generative AI
+91 9511843162 | yogeshbisane2@gmail.com | LinkedIn | GitHub | Kamptee, Nagpur, Maharashtra

PROFESSIONAL SUMMARY

CS Engineering student and Front End Developer with freelancing experience building responsive, component-based web applications. Proficient in JavaScript (ES6+), ReactJS, HTML5, CSS3, and Node.js with REST API integration. Skilled in translating wireframes into production-ready interfaces using design thinking principles. Growing expertise in Generative AI and Prompt Engineering; committed to continuous learning in collaborative environments.

TECHNICAL SKILLS

Front-End: HTML5, CSS3, JavaScript (ES6+), Responsive Design, SASS/LESS, Babel Transpiler

Frameworks: ReactJS, Node.js, component-based architecture (MVC/MV*)

Tooling: Git, GitHub, AJAX, RESTful APIs, VS Code, Code Quality Tools

Databases: MongoDB, Supabase (PostgreSQL), Firebase, SQLite

Cloud & AI: AWS, Firebase, Render, Vertex AI (GCP), Gemini Pro Vision, Prompt Engineering (RAG, Chaining)

WORK EXPERIENCE

Freelance Front End & Full Stack Web Developer

Mar – Jun 2025

Self-Employed | Remote

Client: Australia

- Translated client UX requirements into responsive, cross-device interfaces using HTML5, CSS3, and JavaScript, managing the full project lifecycle independently.
- Scaffolded and architected a full web application using component-based (MVC) patterns, integrating RESTful APIs, secure payment gateways, and automated inventory workflows.
- Presented iterative progress and final deliverables to the client, aligning technical solutions with business outcomes as the primary cross-functional stakeholder.

PROJECTS

E-Menu — Responsive Digital Restaurant Platform

May 2026

React.js · TypeScript · Firebase · Google Authentication

- Built a responsive SPA using React.js (component-based architecture) and TypeScript, applying design thinking to translate UX wireframes into modular, accessible UI components.
- Integrated Google Authentication and Firebase Realtime DB for secure login and live menu management, demonstrating cloud platform and web services integration.

Collaborative Whiteboard — Real-Time Multi-User Canvas App

Apr 2026

Node.js · HTML · CSS · JavaScript · SQLite · WebSockets · Render

- Developed a full-stack real-time collaborative whiteboard using Node.js and WebSockets, demonstrating end-to-end application architecture and Node.js ecosystem knowledge.
- Deployed on Render cloud platform, showcasing familiarity with cloud hosting and production deployment workflows.

EDUCATION

B.Tech — Computer Science and Engineering

Aug 2023 – Present

G.H. Rasoni University, Amravati, Maharashtra

CGPA: 8.5 / 10.0

CERTIFICATIONS

Deloitte Technology Job Simulation (Forage) | Google Generative AI | AWS Cloud Workshop | Walmart Data Mining (Forage)

ADDITIONAL ACTIVITIES

- Led and organised technology-focused college events, demonstrating leadership, teamwork, and public communication skills.
